

ABOUT

Motivated Software Engineer with experience in software development and applied AI. Skilled in designing and deploying intelligent web applications that integrate machine learning models for real-world problem solving. Proficient in Python, Django, HTML, CSS, and data science tools like scikit-learn, pandas, and numpy. Passionate about leveraging AI to enhance user experiences and deliver actionable insights. Strong foundations in backend development, full-stack web technologies, and model integration.

SKILLS & TOOLS

- Languages:** Python, JavaScript, HTML, CSS, C, Java, C#
- Frameworks:** Django, Bootstrap, scikit-learn, pandas, NumPy, Matplotlib, Seaborn, TensorFlow
- Tools:** Figma, Git, GitHub, Jupyter Notebook, VS Code, Anaconda, Excel
- Databases:** PostgreSQL, MySQL, Django ORM
- Data Science & Machine Learning Concepts:** Data cleaning and preprocessing, feature engineering, regression and classification models, clustering (K-Means), predictive analytics, model evaluation and tuning, AI integration, model deployment (Django), and data visualization
- Soft Skills:** Analytical thinking, problem-solving, self-motivation, teamwork, adaptability, technical communication, and attention to detail

EXPERIENCE

Chief Technology Officer (CTO) | LearningSpot Ltd

Apr 2025 – Present | Kigali, Rwanda

- Directed the digital transformation of LearningSpot's platform to enhance accessibility and learning experience.
- Designed and implemented robust backend systems using Python and Django, integrating dynamic user management and course delivery features.
- Supervised frontend development to ensure responsive, user-friendly interfaces.
- Collaborated with business stakeholders to align technology initiatives with company goals.

Full-Stack Developer | LearningSpot Ltd

Oct 2024 – Apr 2025 | Kigali, Rwanda

- Designed and developed the full platform architecture using Python (Django) and modern frontend frameworks.
- Engineered database structures, secure authentication, and dynamic course delivery modules.
- Translated complex business requirements into practical, data-driven solutions.
- Optimized performance and ensured scalability through iterative feature deployment and code reviews.

Software Developer Intern | Diolichat

Jan – Apr 2024 | Kigali, Rwanda

- Developed and optimized backend functionalities using Django and REST Framework.
- Implemented secure data models and API endpoints to streamline integration.
- Assisted in debugging, testing, and performance tuning of backend modules.
- Collaborated with senior developers to improve system scalability and reliability.

Web Project – Digital Land Registration and Management System (DLRMS)

May – Jul 2025 | Individual Project

Designed and developed a web-based system to modernize land registration and management in the Democratic Republic of Congo (DRC).

Key Achievements:

- Implemented backend logic using Python (Django) and frontend interfaces with HTML, CSS, and JavaScript.
- Integrated modules for land title registration, ownership verification, and record tracking.
- Built functionality for generating secure digital land certificates.
- Structured secure database models and automated workflows for user and land data management.

EDUCATION

Bachelor's in Information Technology – Software Engineering

Adventist University of Central Africa (AUCA), Kigali
2021 – 2025

AGANZE KULIMUSHI ARIEL

SOFTWARE ENGINEER

+250790003977
arielaganze@gmail.com
Kigali, Rwanda

CERTIFICATIONS

- Introduction to Data Science with Python – HarvardX (CS109x)
 - Linux Essentials – Cisco
 - Networking Essentials – Cisco
 - Network Operation – Internet Society
-

INTERESTS

- Data Science & Artificial Intelligence: Applying machine learning to real-world problems
 - Blockchain Technology: Exploring decentralized solutions for transparency and security
 - Ecology & Climate Change Remediation: Advocating for tech-driven environmental sustainability
 - Cloud Computing & DevOps: Enhancing scalability and automation of modern applications
 - Tech for Social Good: Using technology to drive education, equity, and health initiatives
 - Human-Centered Design & UX: Building intuitive and accessible digital experiences
 - Continuous Learning: Engaging with online platforms (edX, Coursera) to stay updated with tech trends
-

LANGUAGES
